37 miles: Follow solid outline.

SCITUATE RESERVOIR RIDE - SOUTH

START: Scituate Town Commons, Rt 116

SCENIC NOTES:

An old favorite NBW ride around Rhode Island's largest (man-made) lake, with an extension into Foster. Somewhat hilly and challenging, the route meanders through many old villages (Scituate was first settled in 1710), with mills that prospered in the 19th century. In 1915 14,800 acres, containing houses, schools, churches, mills, farms, ice houses, post office, and an electric railway system were condemned by the RI General Assembly to create the Scituate Reservoir, to supply water to the greater Providence area. You may still be able to see remains of the sunken buildings during dry seasons.
